Hi Muhammad,

Thank you for contacting the ElectroNeek care team!

As mentioned in the section 'Collection of Data on Pages, Groups, and Events' of the article Pages, Groups, and Events - "Your Page, Group, or Event must not collect users' content or information, or **otherwise access Facebook, using automated means (such as harvesting bots, robots, spiders, or scrapers)** without written permission from Facebook.", it is possible that Facebook restricted your account for 30 days due to this reason.

Please note that our bots work well with web automation but each website has its own method of preventing bots from accessing their sites and scraping data. This is something that cannot be controlled from our end. If you need to automate certain processes on Facebook, I recommend reaching out to Facebook for their permission to do it.

I hope the above answer addresses your query.

Regards.
